

TOWARDS A LOW-CARBON EVENT WITH CLIMEET AND YOU

Welcome aboard our shared mission: making this event a step towards a more sustainable world!

1. TRAVEL WITHOUT CARRYING YOUR CARBON FOOTPRINT

Plan your trip with the planet in mind!
Travel is often the biggest contributor to an event's carbon footprint.
Choose sustainable options like biking, public transit, trains, or carpooling instead of driving solo or flying.
Every mile makes a difference!

2. MAKE A DIFFERENCE – BE AN ECO-ACTOR AT THE EVENT!

You too can help make the event more sustainable and low-carbon. Here's how to get involved:

01

Bring your water bottle

Cut down on plastic waste by keeping a reusable bottle with you at all times. Every bottle saved makes a difference!

02

Master the art of waste sorting

Properly separate your waste to boost recycling and reduce landfill. Small actions, big impact!

03

Savor vegetarian options

Choose meals that are better for the planet. Vegetarian food requires fewer resources and produces fewer greenhouse gases. You might be surprised at how tasty vegetarian dishes can be!

04

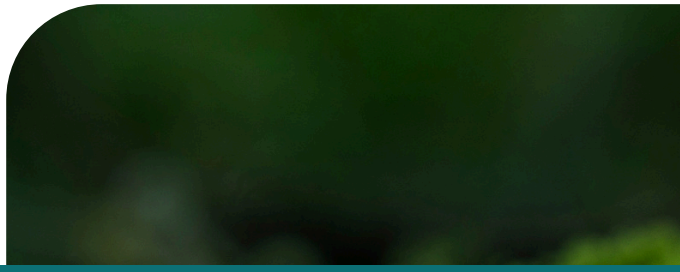

Stay smart, stay close

Pick lodging near the event that you can reach on foot or by public transport. The fewer car trips, the lower the carbon footprint.

05

Opt for sustainable lodging

Consider staying with friends, in local homes, in rental apartments with your group, or in eco-conscious hotels. These options support sustainable practices and help lower energy use.

We're acting too! Practical steps are being taken to reduce our environmental impact throughout the event. Stay connected to see how you can get involved and support these efforts.
Together, we're creating an event that makes a positive difference. Thank you for playing a role in this change!
